

□ ROBO WAR'S RULES AND REGULATIONS

1. Eligibility

Junior Category

- Class limit: 6th to 8th
- Maximum participants: 5 per team

Senior Category

- Class limit: 9th to 12th
- Maximum participants: 5 per team

2. Registration Rules

- Registration must be completed before the deadline announced by the organizers.
- Each team must provide the names of all participating members.
- Maximum participants: 5 per team.
- Only registered team members may participate.
- Any change in registered team members must be approved by the organizers.
- Each team must register its robot and controller details.
- Every team will be assigned a Team Number/ID.
- The Team Number/ID must be clearly displayed on the robot.
- Teams must report at the designated check-in area before their scheduled match.

Late Reporting

- Teams should report at least 15 minutes before their scheduled match.
- A team arriving late may be given a warning.
- Excessive delay may result in match loss/walkover, at the umpire's discretion.

3. Competition Format

- The competition may consist of: Qualifiers → Quarter-Finals → Semi-Finals → Final.
- The exact format will depend on the number of registered teams.
- Normal match duration: 3 minutes.
- An additional 1 minute extra time may be provided when required.
- Maximum playing time: 4 minutes.
- The main objective is to push the opponent's robot outside the arena.
- The robot that successfully eliminates its opponent wins the match.

4. Arena

- The arena will be a flat, smooth, circular platform.
- Arena diameter: 180 cm.
- A clearly visible boundary will be marked.
- The boundary must remain visible throughout the match.
- A robot is considered out when it crosses the designated boundary as determined by the umpire.
- Only competing robots may enter the arena during a match.
- Spectators and team members must remain outside the designated safety zone.

ROBO WAR ARENA

Circular Arena — Diameter: 180 cm

Boundary

Boundary Contact

- Touching the boundary without crossing it does not automatically eliminate a robot.
- A robot remains active until the umpire declares it out.
- The umpire's decision is final.

5. Scoring System

- The competition will use a 100-point scoring system.

Criteria	Points
Pushing opponent out of arena	50
Effective & legal pushing	20
Control & driving skill	10
Defence & strategy	10
Sportsmanship & rule following	10
TOTAL	100

Penalty Points

Violation	Penalty
False Start	-5
Blocking-time violation	-10
Deliberate time wasting	-5
Minor foul	-5 to -10
Major foul	-20
Serious/prohibited violation	Disqualification

6. Tie-Breaker System

- If both teams have equal scores: Judges will first compare legal pushing performance.
- Then control and driving skill.
- Then defence and strategy.
- If still tied, a 1-minute deciding round may be conducted.
- If necessary, the organizing committee may conduct another deciding round.
- The final decision will be made by the umpire/judges.

7. Code of Conduct

- Respect competitors.
- Respect judges, umpires and organizers.
- Use appropriate language.
- Not harass or discriminate against anyone.
- Follow organizers' instructions.
- Accept official decisions.
- Maintain sportsmanship.
- Not deliberately waste time.
- Not interfere with another team's robot, controller or equipment.

8. Match Rules and Definitions

Match Start

- Both robots must be placed in their designated starting positions.
- Robots must remain stationary before the start.
- The umpire will give the official countdown.
- Robots may move only after the start signal.
- Movement before the signal is a false start.

Starting Position

- Each robot will have a designated starting area.
- The robot must remain completely within its starting area before the match begins.
- The robot must not move before the official start signal.

9. Objective of the Match

- The main objective is to push the opponent's robot outside the arena.
- Controlled pushing is allowed.
- Legal blocking is allowed within the permitted time.
- Normal physical contact is allowed.
- Dangerous or intentional destruction is prohibited.

10. Block Time Rule

- A robot may continuously block or hold an opponent for a maximum of 30 seconds.
- If blocking continues for 30 seconds, the umpire will stop play.
- After 30 seconds, the blocking robot will be returned to its designated starting position.
- The match will then continue.
- 1 minute extra time may be provided for the match situation.
- This extra time is not a repair timeout.
- If the team takes more than the permitted extra time, a penalty will be imposed.
- Repeated intentional blocking to waste time may be considered a foul.
- The umpire's decision is final.

11. Robot Stuck / Immobilization

Robot Stuck

- If both robots become stuck together, the umpire may temporarily stop play.
- The umpire may separate the robots and restart the match.
- No participant may enter the arena without permission.

Immobilized Robot

- A robot that cannot move or respond to its controller may be declared immobilized.
- The umpire will determine whether the robot is genuinely immobilized.
- An immobilized robot may be declared defeated if it cannot safely continue.

12. Arena Reset and Match Restart

- The umpire may stop and restart a match if both robots become dangerously entangled; the arena boundary becomes damaged or unclear; a technical problem affects the match; a safety issue occurs; or external interference affects the competition.

- During a reset, both robots will be placed at their designated starting positions.
- Robots must remain stationary until the umpire's signal.
- The umpire will decide whether the clock is restarted or continued.

13. Robot Break / Repair Timeout

- Each team may receive one repair timeout of up to 2 minutes per match.
- Only registered team members may perform repairs.
- No prohibited mechanism may be added during repair.
- The robot may be re-inspected after repair.
- If the robot cannot safely continue after the repair period, the opponent may be declared the winner.
- Important: The 1-minute extra time under the Block Time Rule is separate from the 2-minute repair timeout.

14. Controller Failure

- If a controller disconnects or stops working, the team must inform the umpire.
- The team may use an approved backup controller if available.
- The backup controller must comply with all competition rules.
- A controller must not interfere with another team's robot.
- The team cannot use controller failure as a reason to deliberately delay the match beyond the permitted time.

15. Power Failure

- If the robot loses power and cannot continue, the team may use its permitted repair timeout if applicable.
- If the robot cannot return to active operation within the permitted time, the opponent may be declared the winner.
- The umpire will make the final decision.

16. Robot Recovery

- If a robot flips or becomes overturned during legal play, the match will continue unless the robot becomes unsafe.
- Team members are not allowed to manually turn over or recover their robot during active play.
- If the robot cannot recover by itself, the umpire may declare it immobilized.
- The opponent may continue legal play.

17. Intentional Collisions

Legal

- Controlled pushing.
- Legal blocking.
- Side-to-side contact.
- Driving the opponent toward the boundary.
- Normal contact during competition.

Illegal

- Full-speed ramming intended to damage the opponent.
- Deliberate destruction.
- Deliberately targeting batteries or exposed wiring.

- Continuing to attack after the umpire stops play.
- Any contact creating an unsafe situation.

18. Damage Rules

- Controlled physical contact and damage may occur during Robo War.
- Up to 20% damage to an opponent robot may be permitted, provided it occurs through legal competition and does not create a safety hazard.
- The 20% allowance does not permit dangerous weapons.
- Deliberate excessive damage may result in a penalty or disqualification.
- Deliberately targeting batteries, exposed wiring or safety-critical components is prohibited.
- If a robot becomes unsafe because of damage, the umpire may stop the match immediately.
- The umpire has the final authority regarding the severity and safety of damage.

19. Weapons and Attachments

Permitted

- Passive pushing wedges.
- Non-damaging attachments.
- Other attachments approved during inspection.

Prohibited

- Sharp blades.
- Cutting mechanisms.
- Dangerous spikes.
- Projectile mechanisms.
- Fire/flame mechanisms.
- Explosives.
- Corrosive or dangerous chemicals.
- Electrical-shock mechanisms.
- Signal jammers.
- Intentionally dangerous damaging mechanisms.

20. Fouls

Minor Fouls

- False start.
- Deliberate time wasting.
- Breaking the 30-second blocking rule.
- Touching the robot during play.
- Entering the arena without permission.
- Ignoring an umpire's instruction.
- Repeated unsafe contact.
- Penalty: –5 to –10 points.

Major Fouls

- Intentionally ramming another robot to cause excessive damage.

- Deliberate destruction.
- Using prohibited weapons.
- Interfering with an opponent's controller or signal.
- Tampering with another team's robot.
- Deliberately damaging the arena.
- Human interference during the match.
- Serious unsportsmanlike conduct.
- Penalty: –20 points or disqualification depending on severity.

Automatic Disqualification

- Cheating.
- Use of prohibited devices.
- Tampering with another team's robot.
- Deliberately damaging the arena.
- Physical aggression.
- Threatening officials or participants.
- Unsafe batteries or dangerous mechanisms.
- Repeated major fouls.

21. General Rules

- No outside assistance during a match.
- Only registered team members may operate the robot.
- No unauthorized devices.
- Teams must use their registered robot.
- No unauthorized exchange of robots or major components.
- No deliberate interference with another team.
- Organizers may re-inspect any robot at any stage.
- Exploiting a loophole for unfair advantage may result in a penalty or disqualification.
- Judges' decisions are final.
- The umpire's interpretation is final.
- Only registered team members may enter the competition area.

22. Equipment Rules

Robot Dimensions

- Prescribed dimensions: 30 cm × 30 cm × 30 cm (L × B × H).
- Dimension tolerance: $\pm 10\%$.
- Allowed range for each dimension: 27 cm to 33 cm.
- The robot must remain within the permitted range during inspection and match play.

Robot Weight

- Junior — Maximum: 3 kg
- Senior — Maximum: 5 kg
- Onboard battery is included in total robot weight.

- Remote controller is excluded if it is not physically attached to the robot.
- Organizers may re-check weight at any time.

Maximum Voltage

- Maximum permitted voltage: 12 V.
- Battery must be securely mounted.

23. Robot Inspection & Check-In

- Every robot must pass inspection before competition.
- Inspection may include: dimensions, weight, battery, voltage, controller, attachments, safety, emergency power switch, and overall construction.
- Re-Inspection: Organizers may re-inspect any robot at any stage.
- A robot failing re-inspection may be removed from the competition until the issue is corrected.
- Serious violations may result in disqualification.

24. Battery & Electrical Safety

- Batteries must be securely mounted.
- Damaged, leaking or unsafe batteries are prohibited.
- No dangerous exposed electrical connections are permitted.
- A main power switch should be easily accessible.
- The power system must remain within the permitted 12 V maximum.
- Any robot with an unsafe electrical system may fail inspection.
- The umpire may stop a match if an electrical hazard occurs.

25. Operator & Safety Zone

- Operators must remain in the designated control area.
- Spectators must remain outside the safety boundary.
- No participant may enter the arena during active play.
- Only officials may enter the arena during an active match when necessary.
- Participants must follow all safety instructions.

26. Safety Rules

- Participants must not touch a powered robot unless instructed by an official.
- Robots must be switched off when instructed.
- No fire, explosives or dangerous mechanisms.
- No intentional arena damage.
- Any unsafe robot may be removed from competition.
- The umpire may terminate a match if a robot becomes unsafe; equipment failure prevents continuation; a participant behaves violently; or continuing would be unfair.

27. Match Delay Rule

- Teams must be ready when called for their match.
- Deliberate delays are prohibited.
- Repeated unnecessary delays may result in a penalty.
- The umpire may award a penalty for deliberate time wasting.

- Serious or repeated delay may result in match loss.

28. Disqualification Conditions

- Immediate disqualification may occur for: cheating, misconduct, violence, threatening organizers or officials, property damage, violating class eligibility, exceeding permitted dimensions, exceeding permitted weight, using prohibited weapons, using dangerous batteries, tampering with another robot, or repeatedly breaking competition rules.

29. Appeals

- Teams may appeal a foul or match decision.
- The appeal must be made within 15 seconds of the incident, provided play has not resumed.
- The team must immediately call the umpire.
- The appeal must be made respectfully.
- The umpire will review the situation.
- Final authority: Umpire/Organizing Committee.

30. Awards

- ☐ Winner
- ☐ Runner-up
- ☐ Best Robot Design
- ☐ Best Engineering/Innovation
- ☐ Participation Certificate

31. Organizer Rights

- The organizers reserve the right to change the schedule; modify or clarify rules if necessary; re-inspect any robot; stop a match for safety reasons; disqualify participants violating rules; resolve situations not specifically covered; and cancel or postpone the event due to unforeseen circumstances.

32. Fair Play Declaration

- Every participant agrees to: compete honestly; respect competitors; respect judges and organizers; accept official decisions; follow all competition rules; maintain sportsmanship; and give priority to safety and fair competition.

33. Participant Declaration

- Participants confirm that: registration information is accurate; the robot is built by the participating team; the robot meets all dimension, weight, voltage and safety requirements; the team has read and understood the rules; and the team agrees to follow the instructions of the organizers and umpire.

☐ FINAL TECHNICAL SUMMARY

Specification	Junior	Senior
Classes	6th–8th	9th–12th
Maximum Participants	5	5
Robot Size	30 × 30 × 30 cm	30 × 30 × 30 cm
Dimension Tolerance	±10%	±10%
Allowed Dimension	27–33 cm	27–33 cm
Maximum Weight	3 kg	5 kg
Maximum Voltage	12 V	12 V

Specification	Junior	Senior
Arena Diameter	180 cm	180 cm
Normal Match	3 min	3 min
Extra Match Time	1 min	1 min
Maximum Blocking Time	30 sec	30 sec
Repair Timeout	2 min	2 min
Permitted Damage	Up to 20%*	Up to 20%*
Total Scoring	100	100

* Subject to safety and umpire's decision.

□ 100-POINT MARKING SCHEME

Judging Criteria	Marks
Pushing opponent out of arena	50
Effective & legal pushing	20
Control & driving skill	10
Defence & strategy	10
Sportsmanship & rule following	10
TOTAL	100

ROBO WAR EVENT ORGANIZING COMMITTEE

Safety and fair play shall always have priority over competition.
